

Data

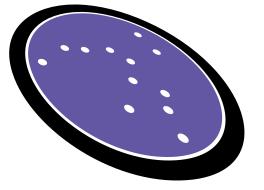

We offer access to the complete SDSS dataset to the world through SkyServer.

You can store any data you like in a private database in CasJobs, or as files in SciDrive.

Query

You can find SDSS data with SQL queries through SkyServer or CasJobs.

You can run queries through scripts using Compute.

SkyServer

Compute

Cross-Matching

You can cross-match your own data with SDSS data using our new SkyQuery tool.

Analysis

You can analyze the largest datasets with Python or R scripts through Compute.
You can share scripts and results

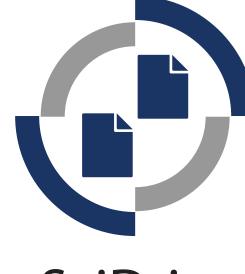

You can share scripts and results while Logged In.

You can share your data and results with colleagues, and you can write files in any format to SciDrive.
